

Practice with Scatter Plots

Classify the scatter plots as having a positive, negative, or no correlation.

7. A history teacher asked her students how many hours of sleep they had the night before a test. The data below shows the number of hours the student slept and their score on the exam. Plot the data on a scatter plot. *Draw a trend line.*

Hours Slept	8	7	7	8	6	5	7	4	9	7
Test Score	83	86	74	88	76	63	90	60	89	81

Use 2 points on your line to determine the equation of your line.

Assume that during a three-hour period spent outside, a person recorded the temperature and their water consumption. The experiment was conducted on 7 randomly selected days during the summer. The data is shown in the table below.

Day	Temperature (F)	Water Consumption (oz)
1	99	48
2	85	27
3	97	48
4	75	16
5	92	32
6	85	25
7	83	20

The Effect of Temp on Water Consumption

Write the equation of your trend line!

Create a scatter plot with the data. What is the correlation of this scatter plot? (Hint: Do not use the day on the scatter plot.)

Faint handwritten notes at the bottom of the page, including the word 'Determine' and other illegible text.
